

FULLY HAMMERLESS SOLUTION FOR SMALL CONSTRUCTION MACHINES

COMET System for Excavators <15 t, Mini Loaders and Backhoe Loaders

- Unique and fully hammerless tooth system.
- Easy 2-step assembly for safe and quick change-outs.
- Optimized wear resistance for longer wear life.
- Range of tooth and adapter designs for all types of construction applications.
- Available in sizes 5, 8, 10 and 15.

EXCAVATOR <15T

MINI LOADER

BACKHOE LOADER

Benefits and Features

SHORT AND SAFE DOWNTIMES

Thanks to the **fully hammerless locking**, tooth change-outs are quick and safe in only **two easy assembly steps**. It is intuitive and an elastomer retainer with flap retention prevents tooth loss.

HIGHER PRODUCTIVITY

The **self-sharpening tooth designs** offer a high level of penetration throughout their wear life and the **reversible teeth** allow an even longer-lasting digging performance.

LONGER OPERATIONAL TIME

The system has been designed to **optimally protect adapter, locking and welding seams** from wear caused by material flow. This makes it more resistant and increases wear life.

MAXIMUM RELIABILITY

A **30% larger nose contact area** provides more tooth-adapter stability and results in less plastic deformation while also increasing the wear life of the adapter.

Chose Your Adapter

CENTRAL (WC)

Suitable for excavators and loaders working in more demanding and abrasive applications.

UNIVERSAL (UC)

Versatile weld-on adapter especially for small excavators working in low impact applications.

FLUSH (FC)

Especially designed for loaders working in cleaning jobs where the surface must be left smooth.
